

What is claimed:

1. A headlamp assembly for a motor vehicle, said headlamp assembly comprising:

a housing;

a first reflector pivotally secured to said housing and cooperating with a first light source to direct a first light beam;

a second reflector pivotally secured to said housing and cooperating with a second light source to a second light beam; and

a connecting bar pivotally connecting said first reflector to said second reflector.

2. A headlamp assembly as set forth in claim 1 including an adjustment mechanism extending between said housing and one of said first and second reflectors for simultaneously adjusting said reflectors and cooperatively aiming said first and second light beams.

3. A headlamp assembly as set forth in claim 2 wherein said connecting bar includes a spherical ball end pivotally secured to said first reflector and an opposing hinge clip end pivotally secured to said second reflector.

4. A headlamp assembly as set forth in claim 3 wherein said first reflector includes a connecting bar mount for receiving said spherical ball end of said connecting bar.

5. A headlamp assembly as set forth in claim 4 wherein said second reflector includes a hinge pin pivotally secured to said connecting bar at said hinge clip end thereof.

6. A headlamp assembly for a motor vehicle, said headlamp assembly comprising:

a housing;

a first reflector pivotally secured to said housing and cooperating with a first light source to direct a first light beam;

a second reflector pivotally secured to said housing and cooperating with a second light source to a second light beam; and

an adjustment mechanism pivotally connecting said first reflector to said second reflector and operative to simultaneously aim both reflectors.
